Location of Inspection Sparta, USA

Description of Product Aluminium Fixed Fuel Tank

Model number AT000070D

Test Report(s) ATC0014 / 4C360-2.1A & TUV H9231

Capacity < 94.64 L

Wall thickness 3.18 mm

5.2.2	Fuel Tanks:		Y
	Tanks, lines and hoses shall be suitably secured and protected from heat. Tank material and construction shall depend on capacity and type of fuel. All tank spaces should be ventilated. Petrol tanks should not be integral with the hull and should be separated from living quarters.		
	Comments:	Conforms to EN ISO 21487 Small craft - Permanently installed petrol and diesel fuel tanks	
Annex II.4	Fuel tanks intended for fixed installations and fuel hoses		Y
	Comments:	Fuel tanks intended for fixed (permanent) installation in craft are covered by Annex II only when placed on the market separately as components	

Conclusion and recommendations

The Technical Construction File and Tests Reports have been reviewed and found to be complete, as required by the Recreational Craft Directive and to be representative of the craft.

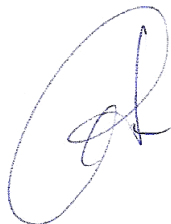

The Aluminium Fuel Tank is considered to meet the relevant Essential Safety Requirements of the RCD as shown above and EC Type Examination Certificate no. HPIVS/R1132-00-I-01 has been issued.

This certificate can be used for all products of this model, provided that no changes are made that could affect any of the assessed Essential Safety Requirements of the product.

HPIVS must be informed of any changes to subsequent product that could invalidate this Certificate.

Authority is hereby given for the Declaration of Conformity to be signed and for the CE mark to be shown on the Builder's Plate.
