

# New Contoured & Thermoformed Parts

Another Innovation from Moeller

## The Best Part of All is Your Substantial Savings.

Save man-time. Save sheet stock waste. Save money with Moeller Contoured Thermoformed parts. Used in seating substrates, bow wraps, hatches, sundecks, combing pads and more – this one-of-a-kind innovation is too cutting edge to reveal but the savings are available for everyone to see.

- + Proprietary manufacturing process keeps structural substrates to design shape vs. sheet stock inconsistency.
- + Reduces man hours & waste
- + Yields equal strength along with part weight.
- + Lower tooling costs allow for structural part customization up to 64"L x 32"W or 54"L x 40"W (maximum part weight not to exceed 19 lbs.)
- + Competitively priced with Wolmanized plywood.
- + Ability to produce complex contours.
